

# digi-gauss DG3

Precision Magnetic Field

'Quick Break' Analyser & Shot Timer

- Includes all of the features found in DG1 & DG2
- 'Quick-break' Analyser - Capture and auto-analyse quick-break pulses
- 'MagTimer' shot timer - time magnetic shots to 2 DP
- 'MagScope' oscilloscope - auto-detect and display AC, HWDC, FWDC and Thyristor wave-forms (single cycle or four cycles)
- Retro deflection needle mode - readings in 0.1G increments, range  $\pm 20$  G
- Gauss trip - background becomes red to notify operator when a reading exceeds 2G, 5G or a customer defined Gauss value upon request (default 3G)
- Small hand-held unit - Aluminium construction with electronic unit not damaged by excessive overloads like mechanical units
- Certified and supplied with zero chamber - calibrated  $\pm 20$ G for measuring residual magnetisms; digitally display last calibration date and serial number
- Upgrade standard case to deluxe splash proof foam-fitted case
