

JAY-MI

Available 19th September 2016

The JAY-MI has been designed to be super lightweight, powerful and durable. The ergonomic injection moulded shell is made from an abrasion and chemical resistant plastic which incorporates a number of rubber gaskets to retard fluid ingress. The JAY-MI is fitted with a self-resetting thermal cut-out and the feet sections include steel 'guard plates' on both sides to reduce long term lamination splaying. The JAY-MI is also recyclable and complies with the EU WEEE Directive.

Key Features

Voltage(s)	110VAC or 230VAC
Current	1.8A and 1.1A
Weight	2.3Kg
Warranty	12 Months
